The History Screen

SaveSnap (LifeTime) Activation Code

+ PrintScreen extension for simple screen snapshots + Snap to Clipboard and to files + Export to BMP, JPEG, GIF + Size scaling (1:2, 1:3, 1::5 ratios) + Saved images will be filename with date/time in ISO8601 format + Numbering of files is remembered + Advanced features of scheduled snaps + Automatic snaps from Windows Start menu, Win+PrintScreen + Support for Photos Studio RAW format - Alt+PrintScreen does not work yet +

You can select directory for saved images + SaveSnap uses multithreading that will allow immediate response during file compression. + When many pictures are being saved or in case of high disk usage, threads are queued so no information is lost + Added on_Closed event to OnStartUp and OnClosed interface - Screen capture has not been tested on Windows XP 64bits - Win+S and G as shortcut buttons have not been tested yet - Screen capture quality has not been tested - Printing of raw photos has not been tested - Saving of RAW format (as BMP) has not been tested yet * SaveSnap is freeware trialware. ----- how to: 1. Enable screenshots in the Graphics tab of the Settings dialog: Settings -> Options -> General -> Screenshots -> Enable. * Results of saving RAW photo in BMP format in full size depend on your photo editor. Most of them are compatible with RAW format, but some don't handle it properly. Some editors have problems with small files, of course the bigger is the better. No info is displayed when RAW photo is saved in BMP format, this information can be checked in RAW photo data.
